How to be a grown up in the cloud?

What is cloud maturity?

 **What is cloud maturity?**

 **Cloud maturity denotes the peak development stage of a cloud, marked by its potential for significant rainfall.**

Why is it so low?

Why is that a problem?

it depends...

Original reset didn't clear local storage as was receiving an empty identifier ("model"), so instead updated it so that reset removes the entire cmm model.

I've also updated the reset at the bottom of each section to use a 'section reset' function, which takes the local storage 'cmm' object, removes the particular section data from it (taken from url), and resets the cmm object with the retrated data. This means the 'hard' reset is only on the first page.
